

100% CUSTOMIZED WRAP LENSES

Stylishly curved wrap frames place unique demands on eyeglass lenses. New P.O.G. Labs 4You 100% customized wrap lenses feature back-surface to put an end to irritating aberrations, and are available in both progressive and single vision styles.

PROBLEM:

- 1: The base curve of the frame requires a lens often steeper than the prescription would usually use.**
- 2: Lenses are tilted around the vertical axis; some wrap frames tilt lenses more than 18-20 degrees.**

The issue that bothers the patients with wrap prescription eye wear in non-compensated eye wear are horizontal prism that affect the binocularity, wrong effective power centrally and poorer vision peripherally than their standard glasses.

SOLUTION:

- ✓ Maximize your peripheral vision, with up to 50% larger clear fields of view.
- ✓ Features a high-performance design that's compatible with thousands of sports frames.
- ✓ Prismatic effects resulting from frame wrap and tilt are virtually eliminated.
- ✓ Customized for each patients full Rx (sph, cyl, axis, add, prism) and frame.
